

MAD-pdf

Medicine Analytics Dashboard - PDF

Version 2 - User Guide with Screenshot Section

1) Purpose of MAD-pdf

MAD-pdf helps users ingest medicine and surgical PDF data, apply filters, track budget and consumption, review charts, and export filtered rows to Excel.

2) Installation

- Download MADpdf_Setup.exe from your website link.
- Double-click the setup file.
- Click Next and then Install.
- After finish, launch MAD-pdf from desktop or start menu.

3) Daily Usage (Simple Steps)

- Step 1: Set institution name and PDF folder.
- Step 2: Click Analyze and Ingest PDFs.
- Step 3: Use Filter Data and Quick Filters (including Cost).
- Step 4: Review budget cards and chart panels.
- Step 5: Export results using Download Excel.

4) What Not To Do

- Do not clear all data unless fully required.
- Do not close the application during active ingestion.
- Do not mix unrelated PDFs in the ingest folder.
- Do not expect filtered output when no data is ingested yet.

5) About the Author

MAD-pdf was authored by G.Amarchand. Author details are shown at the bottom of the tool.

He built solutions including <https://www.pupilsolutions.com> and <https://www.appharmacistsassociation.com>, the POLICE HEALTH MANAGEMENT TOOL, and the MyABS Android app with hospital navigation and SOS sharing features.

His work focuses on practical digital tools that make reporting, service delivery, and daily operations easier for institutions and end users.

Across web and mobile platforms, he has worked on solutions for healthcare, education, and public service use cases, with attention to usability, accessibility, and real-world workflow needs.

MAD-pdf reflects that same approach by turning complex PDF records into a clearer dashboard experience for filtering, review, and export.

6) Screenshots

This section auto-loads images from the guide_screenshots folder.
